sustainability management

FBRH Consultants is a Certified Training Partner of the Global Reporting Initiative (GRI) and an Accredited Training Centre of the Institute of Environmental Management & Assessment (IEMA)

FBRH Consultants is a Certified Training Partner of the Global Reporting Initiative (GRI) and an Accredited Training Centre of the Institute of Environmental Management & Assessment (IEMA)

With this 2-day ESG/ CSR/ Sustainability Global Reporting Initiative (GRI) Certified and IEMA Approved Course, you will learn how to take solid, focused action (materiality) to minimise your company's environmental, economic & social impacts by employing the world's most widely used standards and also how to take action to address the Sustainable Development Goals (SDGs).

The need for a structured and standardised framework for sustainability reporting is increasing. In July 2018, Oslo Børs (Oslo Stock Exchange) recommended all companies to use GRI as a guiding framework for non-financial and ESG reporting.

The tendency is that more and more businesses use GRI as a framework for their reporting, often in conjunction with the use of the UN's Sustainability Development Goals (SDGs) or the UN Global Compact to highlight the key focus areas of the business. Furthermore, with the EU Non-Financial Reporting Directive coming into force, large companies across the EU must report on Sustainability.

CSR/ Sustainability Reporting Done Responsibly

Take positive action. 
Be positive change.
Economic - Environmental - Social

www.sustaincase.com/take-positive-action

Key facts about the Global Reporting Initiative:

- 80% of the world's 250 largest companies issue sustainability/ Corporate Social Responsibility (CSR) reports using GRI's Sustainability Reporting Guidelines.
- The GRI Standards can be used by any organization, regardless of sector, size and location.
- **GRI and the UN Global Compact have joined forces** to enable measuring and reporting on the SDGs with the use of the GRI Standards.
- Under the terms of a Memorandum of Understanding signed in 2010, the **UN Global Compact adopts the GRI Standards as the recommended reporting framework** for companies to communicate on progress made.
- GRI has global strategic partnerships with the Organization for Economic Co-operation and Development, the United Nations Environment Programme and the United Nations Global Compact, with its framework enjoying synergies with the guidance of the International Finance Corporation, the International Organization for Standardization's ISO 26000, the United Nations Conference on Trade and Development and the Earth Charter Initiative.
- GRI is focused on taking action on what matters where it matters: companies identify their impacts on the environment and stakeholders, measure, set targets, take action to minimize their negative impacts and increase their positive impacts, report the outcomes in their CSR/ Sustainability report.

Key facts about IEMA:

- Is the largest professional body for environmental practitioners in the United Kingdom and worldwide, with nearly 15,000 members in over 100 countries which are working together to make businesses and organisations future-proof.
- Approves training course providers to deliver environmental training.
- Is in the process of applying for a Royal Charter. As a chartered body, IEMA would be formally recognised by the UK Government to develop and regulate the profession (corporate sustainability, environmental management, and impact assessment). If IEMA achieves a Royal Charter it will become CIEMA – the Chartered Institute of Environmental Management & Assessment.
